

SACRED GROVE
Arcana of living realms

A JoGi game

SACRED GROVE

Arcana of living realms

The Story

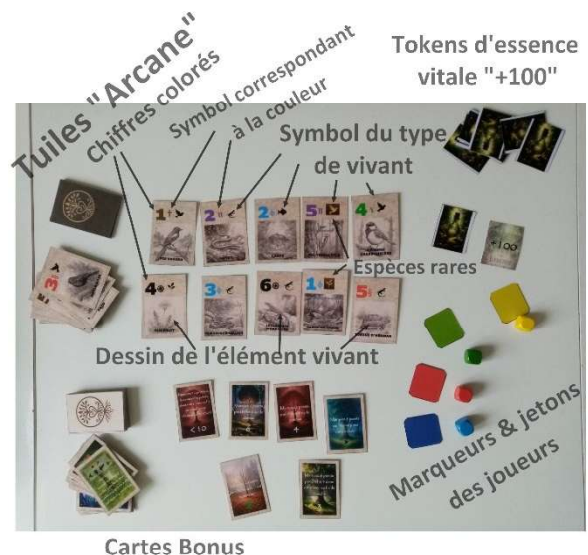

We are all in a more or less conscious way, like the druids or else the indigenous tribes of the world, connected to the nature which surrounds us. In the *Sacred Grove*, players must use their Arcana tiles to obtain the highest Natural Vital Essence. Through their Arcana tiles they must observe nature and the environment, and place living beings around the *tree of life* in a way that optimises their own Natural Vital Essence.

Rules

A strategy game for 2 to 4 players, from 8 years upwards (10 – 50 minutes)

Materiel

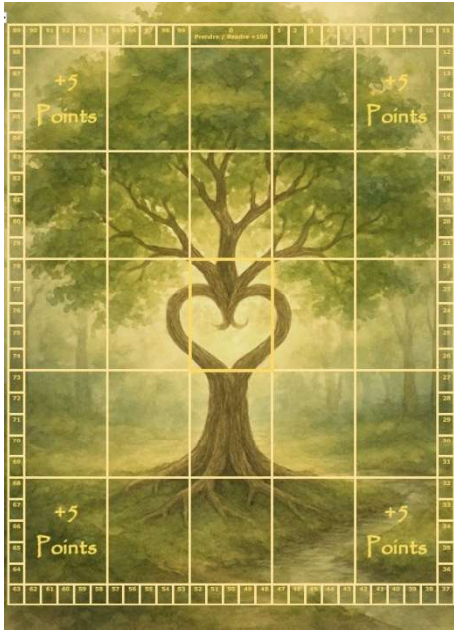

- *Tree of Life* Playing board (5 x 5)
- 36 x Arcana tiles (tiles numbered from 1 to 6, in 6 different colours, and on which a living element can be found)
- 48 x « bonus » objective cards
- 7 Forbidden Arcana cards
- 4 x Player cards
- 4 x player tokens
- 10 x “+100” tokens

Aim of the game

Have more “**Natural Vital Essence**” than all the opponents at the end of the game.

Getting started (each round)

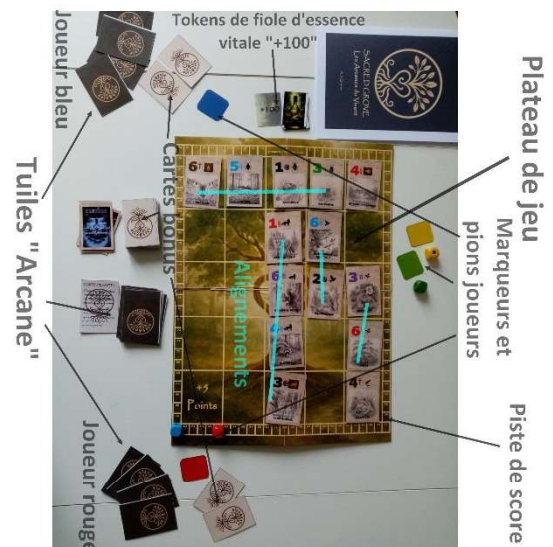

- Put the playing board in the middle.
- Shuffle the Arcana tiles and then shuffle the « *bonus* » objective cards.
- Each player gets 4 Arcana tiles (3 tiles in 4 player games), 2 « *bonus* » objectives, a coloured “player card” and the corresponding (same colour) player token to move around the score path.
- Of the 2 « *bonus* » objectives, each player choses one, and discards the other, which is placed under the other cards.
- The first card of the Arcana tile deck is then placed on the central square of the playing board.

The reminder card is added to the rest of the deck.

Playing

- The wisest player starts by placing an Arcana tile adjacent (horizontally or vertically) to the 1st tile (in the central square), respecting the conditions of playing tiles. They then take a new Arcana tile from the top of the deck.
- The next player (clockwise) then plays an Arcana tile adjacent (horizontally or vertically) to another tile already on the gameboard, respecting the conditions of playing tiles. They, in turn, pick the next tile from the deck.

Arcana tiles must be placed (horizontally or vertically) next to an Arcana tile which is already on the Gameboard. **It is forbidden to place *Arcana tiles* next to others with either the same number or a number of the same colour.**

- Each player, in turn, plays an Arcana tile then draws another one. If they cannot (or choose not to) play a tile, they still draw another Arcana tile.

- When each player has played a certain number of times (2 players = 5x; 3 players = 4x; 4 players = 3x) all players receive another 2 “*bonus objectives*”, of which they chose one, and discard the other.
- Each player moves their token along the ***path of vital essence***, around the game board. If the token arrives on, or passes the 0 / 100 square whilst adding points, the player receives a “+100 *vital essence*” token. If it passes the 0 / 100 square whilst deducting points, they must return a “+100 *vital essence*” token (see appropriate section).

The round ends when the gameboard is completed or when all players cannot (or chose not to) play another tile. The player completing the gameboard **does not** pick another Arcana tile. (As long as the gameboard is not completed, players continue to draw Arcana tiles. If after drawing the last Arcana tile nobody can play, the round ends).

“**Short Stroll**” games consist of only 1 round (10 to 15 minutes).

“**Long Trek**” games last for as many rounds as there are players (25 to 50 minutes), each player being 1st player once.

Scoring during the placing of “Arcana of living realms”

- Alignments of two or more of the same lifeform type **consecutively** (Mammal, Reptile, Insect, Fish, Bird & Plant).

Alignments of 2	=>	+5 Points
Alignments of 3	=>	+8 Points
Alignments of 4	=>	+15 Points
Alignments of 5	=>	+25 Points

- Placing an *Arcana tile* in a corner => +5 Points
- Points scored during the laying of Arcana tiles are doubled if the tile placed has a rare species lifeform (with a **golden** lifeform type icon)

Points scored or deducted at the end of the round

- Each player scores bonus points according to their *objective cards*.
- The numbers on the *Arcana tiles* still in hand are added together, and this sum is deducted from the overall score.

The player with the most **natural vital essence** wins the Arcana of Living Realms!

Playing forbidden « Arcana tiles » (optional mode of gameplay)

If a player plays an Arcana tile in an unauthorised way (next to a tile with either the same number, or a number of the same colour), the other players can call “**Forbidden Arcana**”. The player concerned must retain the played tile, does not pick or play another tile, but must take a **Forbidden Arcana penalty card**. The points on the Forbidden Arcana penalty are added to the end of round points total which is deducted.

Important reminders: -

- The effects of a tile already on the board, rare species (points doubled) or else a tile on a corner square (+5) have no effect on new alignments.
- At the end of the round, during the deduction of the points in hand, the points on a “*rare species*” tile are **not** doubled.
- When scoring points during the tile laying phase, the numbers on the tiles have no effect on the points scored (they just allow to know whether or not the tile can be placed)
- Tiles are layed next to other tiles already on the board (vertically or horizontally). Points are scored from consecutive horizontal or vertical (orthogonal) alignments
