# Black & White

For 2 to 10 players, age 6+

## Equipment

- 24 BLACK cards (with a black circle) *including 12 special cards*
- 24 WHITE cards (with a white circle) *including 12 special cards*
- 4 GREY cards (Cards with both BLACK & WHITE characteristics)

## Getting started

- Each player receives 5 cards, choses 1, then passes the remaining 4 to their left side neighbour (the **draft**). This step is repeated such that each player has 4 cards (the **hand**), each player discarding their final card. For games with 2 / 3 players, or else games with young players, players keep 4 of the 5 cards dealt, without using a **draft**, by simply discarding 1 card, then passing the 4 card hand to the neighbour on the left.
- All discarded cards are placed in the active card pile.
- The 1st player is designated (the winner of the previous game).

## The round

- The 1st card of the deck is revealed, showing either a **white** card or a **black** one. The visible card shows the **active colour**. If the first card is ***grey***, the 1st player has the choice of the **active colour**. (Effects on the opening card are ignored)
- In turns, each player lays a card on the active pile. If the card is of the same colour as the active card, apply any effects of special cards. If the card is of a different colour, then the player must first draw another card from the deck, then apply effects (special card). After playing, drawing another card, and applying effects, play moves to the next player.
- **Grey cards** are considered as being both **white** and **black**. They can be played on any card without having to draw another card. Similarly, any card can be played on a grey card with having to draw another card.

**The winner is the 1st player to have no cards in hand at the end of the round of a player, laying a card, drawing a card (for the laying of a card of colour non active) and applying effects included.**
